> **What this summary leaves out, and why.** The certificates themselves carry handwritten signatures, internal document security codes and, where the holder is an individual, a residential address. None of those are reproduced here. What is reproduced is the registration fact: mark, number, class, holder, filing and validity dates — every one of them a matter of public record and verifiable from the number alone.
>
> **Holders.** The five Chinese registrations are held by Dongguan Ainir Electronic Commerce Co., Ltd., the operating company behind AneerCare. The European Union and United States registrations are held by Shenzhen Sailing E-commerce Co., Ltd., a company under common control with the operating company. The Mexican registration is held by an individual related to the company. The AneerCare word mark is used across the range under these holdings.
